

# SCLERODERMA WILL NOT TAKE MY SMILE!

A WHOLE WORLD OF SUPPORT:  
JUNE 29 IS WORLD SCLERODERMA DAY

Scleroderma is a rare autoimmune disease that turns simple daily activities into real challenges. It can affect all organs in addition to the skin. As yet there is no cure. But families and patient organisations refuse to give in. Join us as we spread awareness and support research. **We will not lose our smiles!**
